DETAILED ACTION

Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As to claim 1, "the read oscillation" lacks antecedent basis. The "the input" (line 5 from last) is confusing, as the loops have a plurality of inputs. Should "the input" read -- an input --?

As to claim 4, "the stimulating oscillation" lacks antecedent basis.

As to claim 5, "the input" (line 4) is confusing, as the rotation rate control loop seems to have a plurality of inputs. Should "the input" read -- an input --?

Claims 1-5 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
